Re: Edmundson E-2 Application

Dear Jeff,

Thank you so much for your professionalism and fine service to us.

In my more than forty years of business ownership, with more than twenty of those as an expert witness and forensic consultant on hundreds of matters, I routinely encounter complex situations, in need of specific expertise. No better example of such complexity exists, than in my recent attempt to assist a family member in obtaining an E-2 Visa, to come to the U.S., from the U.K.

I do not know how we would have gotten to the filing stage, without your expertise and understanding. I've worked with many advisors over the years, but rarely does one have the opportunity to work with someone so willing to contribute whatever is needed to reach the goal. In addition, your finished product, the business plan and support document are as well done as any I've seen, in all these years.

Time constraints placed on us all, by the nature of the business we are selling, placed an additional burden on you, as did the fact that you had to seek input from different sources, one here, and one in the U.K. Thank you for rising to the occasion, despite the stress we caused you.

I am grateful to you for your efforts on our behalf, and grateful to Chris, for telling us about you.

Sincerely,

Richard T. Callahan
